DOUGLAS REINHART P.E.
SANITARY ENGINEER

Tom and Theresa Huebner
21402 ST.Rt. 198
Wapakoneta, Ohio 45895

May 11, 1994

Upon your request, I researched the location of your residence versus the flood plain maps for Auglaize County. Attached is Map # 39011C0010C showing the area of your home (marked) and the SR# 198, Auglaize River and Six Mile Creek Area.

According to the Ohio Department of Transportation plans for the SR# 198 bridge over ~~Six~~ Mile Creek, located several hundred feet north of your residence, the 100-year flood elevation for that area would approximately 831.0 feet above sea level. This morning I personally transferred that elevation to your residence. I found that since your residence does not have a basement, the lowest floor elevation is 834.5.

Therefor, if another 100-year flood would occur, it would still be approximately 3.5 feet lower than the first floor of your residence. Your house and accompanying buildings are therefor not in the floodplain and the need for flood plain insurance is not necessary.

Respectfully submitted,

Douglas Reinhart, P.E., P.S.
County Sanitary Engineer
Auglaize County Flood Plain Coordinator
