In Re: Flood Plain Certification/Determination
: FIRM map # 39011C0105C

To Whom It May Concern:

This letter is in response to a request for verifying that the new/proposed development at Glacier Hill Lakes will be according to the local flood plain management plan. Based upon FIRM map # 390011C0105C, it shows that the 100-year flood zone A stops just north of Pusheta Rd., which is north of the proposed improvement. Therefore, based upon the FEMA mapping system the proposed site is not subject to the 100-year flood. However, this letter is not suggesting that the site may or may not be subject to localized flooding in any event. Should the owner wish to have more investigation done as to the possibility of localized flooding, they should contact a surveyor or engineer to do a more in-depth study of the site. If you have any questions in regards to this letter feel free to contact our office at 419-739-6520.

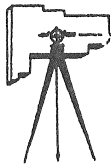

Sincerely,

Douglas Reinhart, P.E. P.S.

RE: Flood Plain Information

To whom it may concern,

Due to a construction addition at Glacier Hill Lakes, located in the East 1/2 of the N.E.1/4 of Section 15, Pusheta Township, Auglaize County, Ohio, inquiry was made by Glacier Hills Lakes as to the flood plain status of this area as determined by the Federal Emergency Management Agency.

There is no map issued by FEMA for the area in question therefore indicating that the property is in Zone X. (Not in a flood plain) The map adjacent to the north of this property also indicates no flood plain south of Pusheta Road. This map number is 39011C0105 C Effective Date: September 6, 1989.

If you have any further questions give us a call at the above number. Thank you.

Sincerely:

Larry McLean
